

Prof. Dr. Anyi Mei  
(Huazhong University of Science and Technology, China)

Anyi Mei earned his Ph.D. in Optical Engineering (2018) and B.S. in Materials Science and Engineering (2013) from Huazhong University of Science and Technology (HUST). Since 2018, he has been working at the Michael Grätzel Center for Mesoscopic Solar Cells within the Wuhan National Laboratory for Optoelectronics (WNLO) at HUST, where he specializes in mesoscopic optoelectronic materials and devices. His research focuses on developing fully printable mesoscopic perovskite solar cells, pioneering cost-effective fabrication techniques for next-generation photovoltaic applications.
