

Husnu Emrah Unalan received his B.S. degree in Metallurgical and Materials Engineering from Middle East Technical University (METU), Türkiye in 2002, and his M.S. and Ph.D. degrees in Materials Science and Engineering from Rutgers University, USA, in 2004 and 2006, respectively. He worked as a Research Associate in the Electrical Engineering Division of the University of Cambridge from 2006 to 2008. Since 2008, he has been with the Department of Metallurgical and Materials Engineering at METU, where he is currently a Full Professor and Director of the Micro and Nanotechnology Graduate Program. He is also affiliated with the Center for Solar Energy Research and Applications (GÜNAM) and the Energy Storage Materials and Devices Research Center (ENDAM). His research focuses on nanomaterials, particularly triboelectric nanogenerators, energy harvesting systems, flexible and wearable energy storage devices, and polymer-based materials for sustainable energy and sensing technologies. He received the Turkish Academy of Sciences Young Scientist Award in 2009, the Scientific and Technological Research Council of Türkiye (TÜBİTAK) Incentive Award in 2014 and Science Academy of Türkiye Young Scientists Award (BAGEP) in 2015. He has authored over 150 peer-reviewed articles and 2 book chapters, with more than 9,200 citations as of April 2025.
