

Tierui Zhang received his PhD in Chemistry from Jilin University in 2003. He is currently a professor and doctoral supervisor of Technical Institute of Physics and Chemistry, Chinese Academy of Sciences, and Director of Key Laboratory of Photochemical Conversion and Optoelectronic Materials, CAS. He was named a fellow of the Royal Society of Chemistry (FRSC) in 2017 and a fellow of the Chinese Chemical Society (FCCS) in 2023. He has won the Science and Technology Award of China Photographic Society - Grand Prize (The first winner of the award) and other awards. He is the project leader of Royal Society-Newton Advanced Fellowship, “Outstanding Young Scholars” of the National Science Fund and Key Project of International Cooperation of National Natural Science Foundation, and a chief scientist of key special projects of the National Key Research and Development Plan. He is also the associate editor of Science Bulletin, Industrial Chemistry & Materials, Nano Research Energy and Transactions of Tianjin University, and also serves as an editorial board member for peer-reviewed journals including Advanced Energy Materials, Advanced Science, Chemical Science, Carbon Energy, Small Methods, Small Structures, Solar RRL, Scientific Reports, Materials Chemistry Frontiers, ChemPhysChem, The Innovation, and SmartMat. Currently, he holds academic positions such as Deputy Director Standing Committee of Photochemistry Professional Committee of China Renewable Energy Society, Secretary-General of Energy Chemistry Professional Committee of Chinese Chemical Society, and Chairman of Photocatalysis Professional Committee of China Photographic Society. He is mainly engaged in the research of energy conversion nanocatalytic materials, and has published more than 360 SCI papers in Nat. Catal., Nat. Commun., Adv. Mater., Angew. Chem., JACS and other journals, which have been cited more than 48000 times, with an H index of 119. He was named in the annual Highly Cited Researchers 2018-2024 List by Clarivate Analytics; 59 national invention patents were authorized.
