

Xun Hong is a professor at the Department of Applied Chemistry, University of Science and Technology of China (USTC). He received his bachelor degree and PhD from USTC in 2004 and 2010, respectively. He started working as a postdoctor at Tsinghua University and Nanyang Technological University in 2010 and 2012, respectively. His research program aims at the synthesis and characterization of amorphous nanomaterials and supported single atom nanomaterials for catalytic application
